knfbReader Mobile

KNFB Software runs on a multifunction cell phone which allows the user to read mail, receipts, handouts, currency and many other documents wherever the user happens to be. This is a truly pocket-size solution to reading on the go. Available with MobileSpeak and GPS Navigation options.

Mobile Geo

Mobile Geo is the first solution specifically designed to serve as a navigation aid for people with a visual impairment which works with a wide range of mainstream mobile devices. With Mobile Geo, you can pinpoint your location, learn about the points of interest (POIs) in your immediate vicinity, plan a route between specified points of origin and destination, and get instructions on maneuvers to make as well as information about waypoints.

Mobile Speak

Mobile Speak, when installed on a mobile phone, synthesizes speech output generated using text-to-speech (TTS) technology and routes through the speaker or headset. Screen contents can also be presented in Braille if the mobile phone is connected to a Braille device.

Braille Sense Plus

Braille Sense Plus is the first Braille notetaker to offer notetaking, networking, audio capabilities and much more in one compact unit. Capable of running up to seven programs simultaneously, Braille Sense Plus is the first true multi-tasking Braille notetaker in the industry.

SyncBraille

The **SyncBraille** is one of the smallest, lightest, and most affordable, portable Braille displays in the world.

Use it as a portable Braille display with the Voice Sense or your favorite screen reading software - Window-Eyes. 20-cell units are available.

VoiceSense

The Voice Sense is the smallest, lightest and most fashionable PDA for the visually impaired with a Perkins style keyboard for inputting information and synthesized voice for outputting information.

It has multimedia functions: a Daisy talking book player, an MP3 player and voice recording capabilities. Wireless networking features (such as wireless LAN and Bluetooth) are also available, as are many other Braille notetaker features.

BookSense

The new portable digital audio book player, BookSense, allows people to access information for education, information, and entertainment. Students can access school textbooks, people in the workplace can stay current with journals or business magazines, and anyone can enjoy newspapers, favorite novels, a bestseller, and even their favorite music. In addition to all of the standard features, the **BookSense XT** boasts 4 GB of built-in memory, an FM radio, and Bluetooth capability.

Intel Reader

The unique design combines a high-resolution camera with the power of an Intel® Atom processor that converts printed text to digital text, then reads it aloud.

Eye Pal Solo

Reads aloud almost any printed document without a computer. Features include advanced OCR accuracy, instant scanning, motion activation, voice support and more.
