Sicare Light II

Convert spoken commands into signals and control numerous devices including Televisions, Telephone, lights, Medical Beds and so much more. The Sicare Light II is a new introduction to the North American market featuring simple voice programming steps and improved voice recognition. This portable device is designed for use in a single room environment.

- ◆ 15 pre-set command menus including Television, Bed, TV, Satellite, Light, Fan and other devices
- ◆ Seamless operation of Telephone and the Bed Controller
- ◆ No computer or laptop programming required during installation
- ◆ Direct-to-unit infrared trainable for easy programming
- ◆ New microphone settings for background noise adjustments just like the SiCare Standard
- ◆ X-10 control through the IR command center
