

Release Notes for Sense Notetaker version 6.0

2011-05-17

HIMS

New features

1. General

- Adds the ability to Input/Search for Control Characters.
- Adds a function to delete all system files on reboot.
- Removes the message, "Are you sure?" when deleting a line.
- Adds UEBC Braille rules and an option to switch between US Braille and UEBC Braille in the Global Options.
- Adds an "Abbreviations on/off option in Global Options to control the way groups of letters are pronounced by the speech Synthesizer (TTS).
- Adds 3 new items to the Main Menu: Extras (x), Social Networking (c), and Programs (p).

2. File Manager

- Adds support for sharing files over a Local Area Network: browse files on a remote PC and open them as you would on a drive connected to the Sense Notetaker.

3. Word Processor

- Adds the ability to read PDF files and save them as Doc or text format.
- Adds the ability to read E-pub files and save them as Doc or text format.

4. Radio

- Adds recording time information when recording a live radio channel.
- Adds hotkeys for adding, deleting and modifying presets (Add: space-i/Alt-i, Delete: space-d/Delete, Modify: space-m/Alt-m).

5. E-mail

- Adds a confirmation prompt when trying to save an e-mail address that is already saved in the address Manager.
- Adds a menu item for saving a sender's e-mail address.

6. Social Networking

- Moves MSN Messenger to this menu and adds Auto Sign-In capability.
- Adds new Google Talk client: use it for text or voice chat and share files with friends (not available for Braille Sense Classic).
- Adds new Twitter client: share short messages or links with others, or follow others who do via timeline.

7. Utilities

- Adds new Menu Management program which can be used for hiding or showing programs in "Extras" and "Social Networking" menus.
- Adds support for WPA2 Network mode and AES encryption for wireless connection via Wi-Fi router.

8. Extras

- Adds Sense Dice game and Sense Brain game to BSP, BSPQ, VS and Classic models.

Changes in features

1. Word Processor

- Changes the method for inserting Date and/or Time. They can now be inserted separately.
- Changes Braille display auto scroll speed increments from 1 second to half second and expands the available levels from 20 to 35.

2. Address Manager

- Changes the hot key for "Import from CSV" from "r" to "c".

3. Web Browser

- Changes hotkeys for "save as" from Alt-s to Ctrl-s and "Set current home page" from

- Ctrl-s to Alt-s in Braille Sense PLUS QWERTY and Voice Sense QWERTY.
 - Changes default Homepage from brailleSense.com to hims-inc.com.
 - Changes Braille display auto scroll speed increments from one second to half second and expands available levels from 10 to 20.
4. **Utilities**
 - Changes the hotkey in calculator for cosine function from Enter-c to Enter-l.
 - Changes the hotkey for copy to Clipboard from Enter-i to Enter-c.
